

January 19, 2009

To Our Valued Customers,

First, we want to unequivocally assure you, that Sunland, Inc., is not involved in the supply chain or the manufacturing of the peanut butter distributed by King Nut or Peanut Corp.

Whereas we are not involved, we appreciate and understand your concerns about the most recent salmonella outbreak, which may be linked to certain peanut butter products. We hope to alleviate those concerns and insure your peace of mind in connection with Sunland products.

We would like you to know that our strict adherence to GMP's (Good Manufacturing Practices), combined with our continuous testing and sampling practices, ensure that any and all products processed and manufactured by Sunland, exceed FDA requirements. Our laboratory testing is provided by Silliker Laboratories, a recognized independent provider.

Should you have any questions or would like more information, please contact Samantha Rector, our QC/QA Manager, at 575-356-6638 ext. 21.

Sincerely,

Jimmie Shearer
President and CEO
Sunland Inc..
